

Arzell, Inc. offers several preventive service options for your consideration aimed at reducing the risk of equipment failure that could hinder your production or cause safety concerns for your employees.

- **A current safety inspection of your existing equipment to assess areas of potential failure**
- **Several levels of annual preventive maintenance tailored to your specific system or piece of equipment.**

Current Safety Inspection

Depending on the type of equipment, this may include:

- **Pressure and seal checks**
- **Test amp draw**
- **Cable condition checks**
- **Safety circuit checks**
- **Electrical connections**
- **Heater cleanliness**
- **Hose condition checks**
- **Lubrication of parts**
- **Control panel(s) condition**
- **Inspect air lines**
- **Check hydraulics**
- **Check belts and pulleys**
- **Visible weld checks**
- **Test valve functionality**
- **Check fluid levels**
- **Check hardware**
- **Check RPM pickup**
- **Check terminal tightness**

Annual Preventive Maintenance Contracts

These include:

- **Options tailored to the specific operation or programming need**
- **Safety checks of critical components**
- **Your choice of various degrees of service interruption**
 - **Minimal**
 - **Medium**
 - **Full planned outage**
- **Training programs**
- **Coding development or improvement**
